

Experts In Fusing Identification & Security Solutions

Not Just Another "ID Company"

Fusion ID Technology is committed to providing customers with a consultative approach in finding simple, cost-effective and reliable security and identification solutions.

Photo Identification Card Systems

Identification of employees, customers and visitors is a critical element of a comprehensive security solution for corporations, educational facilities, hospitals and other venues. ID cards allow your organization to quickly identify if a person belongs - or is a threat. When integrated with an Access Control system, your organization will be able to provide a safe and efficient environment with many other potential benefits such as:

- Individual access to buildings, areas, and parking
- Computer and copier login
- Time and attendance tracking
- Cafeteria and cashless vending
- Special event access

Choosing the proper Photo ID System is a critical first step to a complete security solution.

Access Control & Intrusion

An access control system determines who is allowed to enter as well as where and when they are allowed to enter or exit. Historically, this was accomplished through keys and locks. Electronic access control systems use computers and electronics to solve the limitations of mechanical systems and have significant advantages such as:

- Customized access determined by credentials presented
- Entry remains secure at all times
- Upon access, door remains open only for a predetermined length of time and then is re-secured
- Alarm capability for events such as forced entry or door propping
- All access attempts are recorded, including denied access

Custom Printed Cards

A membership card is arguably the most important aspect of any member based program. Customized cards attach a tangible product with an organization, club or cause. It gives members a tangible asset to hold that shows they are a part of something official and worthwhile. A high quality card is an extension of your marketing and branding efforts so looks matter. Fusion ID specializes in these types of cards:

- Plastic Key Tags – Single, Double, Triple
- Door Key Cards
- Membership / Gift / Loyalty / Fundraiser
- Hangtags
- Special Event Credentials

Fusion ID Technology has over a decade of experience helping clubs, membership organizations, associations, schools and other groups with their custom card and tag needs. Let us help you with your printed cards too.

ID Card Printer Supplies & ID Badge Accessories

Fusion ID is a leading supplier for ID Card Printer ribbon, cards and badge accessories. We offer all of the consumables and most popular employee ID card accessories from the industry leading manufacturers such as:

- Matica
- HID/Fargo
- Zebra
- Datacard
- Evolis
- Magicard

It is important that your organization has badge accessories that match your marketing and branding standards. Ask us about customizing your badge reels or lanyards with your company name and logo.

Video Surveillance Systems/ CCTV

Video surveillance first appeared in workplaces as a measure to protect companies from theft or robbery. However, video surveillance has expanded since those early days and has been adopted and used for multiple purposes. The use of video cameras in the workplace is on the rise because of the significant benefits it provides such as:

- Creating a safer environment for employees and customers
- Deterring theft, violence, and vandalism
- Helping to identify offenders
- Monitoring misconduct
- Providing recorded documentation of incidents

Fusion ID Technology is able to offer our customers many different choices when it comes to Video Surveillance.
